TOTAL COMMENTS: 8

1) I have a hard time reproducing his proof techniques, and for the homework I find myself dependent on him. I.e. I feel like I end up using his proofs instead of my own for the homework and subsequently don't learn how to do them; otherwise the best TA I've ever!

2) TA is fine, but there isn't always enough time to go over everything that needs to be covered in the section.

3) The TA is very good at helping us find solutions to difficult homework problems. I would not have been able to make it through this course without him.

4) great TA

5) precise, straight to the point. makes an effort to ensure students understand basics before moving forward.

6) Section is key to understanding the concepts of the chapter as the lectures consist mostly of the proofs of the chapter concepts. Sometimes it is difficult to understand the significance of certain concepts and Franklin very well illuminates the application of the concepts and the reasoning behind the way they are applied. In this way he has contributed greatly to my understanding of Linear Algebra.

7) I love my TA so much, without him I will fail in this class.

8) very helpful...especially for the hw
